

9. TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided for under this License. Any other attempt to copy, modify, sublicense or distribute the Document is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

10. FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions of the GNU Free Documentation License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. See <http://www.gnu.org/copyleft/>.

Each version of the License is given a distinguishing version number. If the Document specifies that a particular numbered version of this License "or any later version" applies to it, you have the option of following the terms and conditions either of that specified version or of any later version that has been published (not as a draft) by the Free Software Foundation. If the Document does not specify a version number of this License, you may choose any version ever published (not as a draft) by the Free Software Foundation.

Beginner topics	User Interface topics	Advanced topics
• Overview • Getting started • Language fundamentals • Classes and objects • Basic arithmetic • Collections • Exceptions • Concurrent Programming • Javadoc & Annotations • Byte Code	• Basic I/O • Event handling • Intro to Swing • Graphics • Applets	• Networking • Database programming • Reflection • Design patterns • Libraries, extensions and frameworks • 3D programming • Threads
